## Acrosemi Corporation Named SemiProbe Representative

Winooski, VT – April 19, 2010 – SemiProbe

### **SemiProbe announces the appointment of Acrosemi Corporation as Representative for Vietnam.**

SemiProbe is pleased to announce Acrosemi Corporation as our Sales Representative for Vietnam. Acrosemi Corporation provides the growing Vietnam Semiconductor market with technical solutions, products and services. Taking advantage of a growing trained technical workforce, many global semiconductor companies are looking at Vietnam for their backend solutions. According to Denis Place – President of SemiProbe, “The growing Vietnam semiconductor market needs a local sales channel to support our wafer and die inspection and probing systems. Acrosemi provides that support for our products.” The extensive SemiProbe product line provides solutions from R & D labs to production.

## About Us

SemiProbe is a global supplier of innovative probing and inspection equipment for microelectronics, photovoltaics, optoelectronics, MEMS, biotechnology, chemistry, microfluidics, and nanotechnology. We provide industry with modular and high quality technology to insure confidence in the test and inspection results and to significantly help lower overall costs. SemiProbe works with leading R & D Centers globally to develop next generation equipment and then follows the product test requirements to produce full production solutions. SemiProbe offers a line of manual, semiautomatic and fully automatic systems and a complete line of accessories. The company is based in Winooski, VT USA.
